a Dashboard: ligand browser (search result and the selected ligand)

b Dashboard: AI assistant

c MCP server: one tool call from an agent

MCP client ⇄ reel-quest server (stdio)

```
tools/list → 10 tools, e.g. get_database_statistics

→ tools/call  get_best_separators
  {"element1": "Eu", "element2": "La", "limit": 3}
← result
